PROFESSIONAL EXPERIENCE

LABELBOX

San Francisco, CA

Robotics and Operations

OCT 2025 - May 2026

- Maintained high-quality robotics training data through precise operation and calibration of xArm robotic systems, ensuring consistency and reliability across data collection workflows.
- Utilized Linux environments and terminal-based tools to operate, configure, and manage robotic hardware and software systems efficiently.
- Developed a custom motion-capture scripting pipeline integrating Manus gloves to accurately generate MCAP data compatible with Foxglove for robotics analysis and playback.
- Diagnosed and resolved robotic hardware and software issues, minimizing downtime and improving operational reliability during testing and data collection.
- Streamlined robotics data collection procedures through scripting and workflow optimization, improving accuracy and efficiency.

MISSION BIT

San Francisco, CA

Game Design Teacher

AUG 2024 - Dec 2025

- Taught high school students the fundamentals of Unity game development and introductory C# programming concepts through hands-on projects and interactive instruction.
- Collaborated with instructors and educational staff to create an engaging and supportive learning environment for students of varying technical backgrounds.
- Guided students through the game development process, including gameplay mechanics, scripting, debugging, and project development in Unity.

BOTSTACKS

Remote

Game Engineer Intern

MAY 2025 - July 2025

- Developed and refined user interface (UI), user experience (UX), and sound effects (SFX) systems to improve overall application usability and player engagement.
- Conducted quality assurance testing to identify, document, and resolve software bugs, contributing to improved application stability and performance.
- Collaborated remotely with the development team to implement gameplay and interface improvements within an agile development environment.

THIRD FLOOR GAMES

Remote

Mobile Developer Intern

Nov 2024 - Feb 2025

- Developed and integrated analytics tracking, push notification functionality, and online leaderboard systems to enhance engagement and monitor user activity.
- Collaborated closely with senior developers and mentors through code reviews, technical discussions, and iterative development processes.

EDUCATION

UNIVERSITY OF CALIFORNIA, SANTA CRUZ

Santa Cruz, CA

Bachelor of Science in Computer Science: Computer Game Design

ADDITIONAL INFORMATION

- Program Management: Resource Planning, Jira, MS Project,
- Technical Skills: Python, C++, C#, Unity, Java, JS, HTML, CSS, Claude, Gemini, ChatGPT, Foxglove, MCAP, robotics
